

## **New Holland Kobelco E385 E385b Workshop Service Manual**

The intelligent hydraulic system S.H.S. (Smart Hydraulic System) interacts continuously with the on-board computer A.I. (Artificial Intelligence).

This combination of highly advanced electronic technology and a sophisticated, but simple, hydraulic system, delivers performance and versatility that breaks the rules. It represents an evolution not available from other manufacturers, with power supplied "on demand" by two variable displacement axial piston pumps.
